

The Gas Family

Stowe Model 8325

The Stowe is compact, easy to use, and reliable addition to your living space.

Features

Enameled cast iron

The small size and beautiful style of this cast iron stove inspired us to offer it in our unique oyster enamel, as well as our classic brown enamel and matte black.

Easy to use

The Stowe 8325 maintains a standing pilot which will shut off after 7 days of inactivity. It can be run manually, with a standard or programmable thermostat, or with an optional remote control.

Efficiency you can feel

In addition to burning cleanly, the Stowe uses a cast iron heat exchanger to move the heat from the fire into your home, not up the chimney.
